

Wanco® Fold-n-Go™ Flashing Beacon Trailers

Portable flashing beacon trailers for regulatory signs of any type

- Quick setup and take-down
- Compact and easy to tow
- Flashing beacons
- Expandable for ITS applications
- Battery powered with solar charging system

Wanco® Fold-n-Go™ Trailers provide a portable platform for temporary display of regulatory signs. Fold-n-Go Trailers deploy quickly and easily, alerting motorists of work zones, reduced speed zones and other hazards.

Standard trailers are available in two sizes to accommodate sign widths of either 36 or 48 inches. Custom trailers are engineered to meet specific state regulations. The largest trailer is designed for use on high-volume roadways.

Fold-n-Go trailers feature a versatile, heavy-duty frame for installing one, two or three signs of varied sizes all at once. The frame folds down quickly using a hand-operated winch. Signs are user-supplied.

A pair of high-output beacons draw attention to the signs. The beacons flash on and off in an alternating pattern. 8-inch beacons are standard and 12-inch are optional. Onboard power for the beacons comes from batteries, charged automatically by an integrated solar-based charging system.

A choice of Fold-n-Go models offer effortless transport, easy roadside placement and quick deployment by a single person in just minutes.
